Subject: Guardicore presentation for Verizon

Lowell Hi
Thinking of your visit to Israel I will appreciate it if you and/or your technical experts can look into the potential of a young extremely advanced Cyber Security company with which I am involved.
It's a SDN related advanced solution, based on Dynamic Honey Pots,for high volume enterprise-wide SDN server and data centers.
I've attached a 1-pager re GuardiCore. And could provide more details during a meeting.
We don't need more than 15'-20' min of your time but a little bit more from your technology/security person/s.
Looking forward for your response and waiting to see you in Israel.
Best
Ehud Barak
